

Santa Clara Valley Water District Qualifying Products List
 Spray Bodies Or Rotor Sprinklers With Pressure Regulation And/Or
 Check Valves

The following list contains sprinkler bodies or rotor sprinklers with Pressure Regulation and/or Check Valves components. Pressure Regulation in the sprinkler body reduces water loss by ensuring sprinkler nozzles are operating within the optimal pressure range they were designed for. Check Valves limit water loss on sloped sites caused by low head drainage. To inquire about the eligibility of a model not found on the list that contains pressure regulation and/or check valve components, please call the Water Conservation Hotline at (408) 630-2554.
